

# Tavily Hacker Guide

July Berlin Hack:Europe — 18th of July

## What is Tavily?

Tavily is a search API built specifically for AI agents and LLM applications. Unlike traditional search engines designed for humans, Tavily delivers clean, relevant, and structured results optimized for machine consumption—so your AI agents can search the web, extract content, and get real-time information in a single API call.

Whether you're building a research assistant, a RAG pipeline, an autonomous agent, or any application that needs real-time web data, Tavily provides fast, accurate, and LLM-ready search results out of the box.

## Core Endpoints

| Endpoint               | Description                                                                                 | Docs                 |
|------------------------|---------------------------------------------------------------------------------------------|----------------------|
| <code>/search</code>   | Search the web and get AI-optimized, structured results with relevant content snippets.     | <a href="#">Link</a> |
| <code>/extract</code>  | Extract clean, structured content from any URL—ideal for scraping pages for RAG and agents. | <a href="#">Link</a> |
| <code>/crawl</code>    | Crawl a website and extract content from multiple pages systematically.                     | <a href="#">Link</a> |
| <code>/map</code>      | Map an entire website's structure, returning all discoverable URLs.                         | <a href="#">Link</a> |
| <code>/research</code> | Conduct deep, multi-step research on a topic with comprehensive, synthesized results.       | <a href="#">Link</a> |

## Free Credits

Sign up at [tavily.com](https://tavily.com) to receive **1,000 free API credits per month** on the free tier—no credit card required. This is more than enough to start building and demoing your hackathon project.

## Redeem your Tavily credits

For this hackathon, instead of handing out a one-time batch of extra credits, **we're giving you our Project monthly plan free for 2 months.** To redeem:

1. Make a free account at [www.tavily.com](https://www.tavily.com).
2. Navigate to the "Billing" tab.
3. Click on the "Project" monthly plan.
4. Enter the code **JulyBerlin** to redeem **8,000 credits**.
5. Redeem your API key from the dashboard.
6. Copy the key and store it.

## Support

For support during the hackathon, join the [Tavily Discord community](#). Our team and community members are available to help with API questions, integration guidance, and troubleshooting.

## Prizes

### Best Use of Tavily

Build a project that leverages Tavily's APIs in a creative and impactful way.

1. **1st Place:** 10,000 API credits
2. **2nd Place:** 5,000 API credits
3. **3rd Place:** 3,000 API credits
